

# OUR ART GUARANTEE

- From January 2025

We are confident in our fertility team and in the success of our outcomes. Which is why we offer guarantees with our fertility programs.

You will not be treated with a 'one size fits all' plan. Your treatment is safely managed by a private clinician and care is customised to your needs.

You will not undergo IVF unless it is clearly necessary. In many cases with an accurate diagnosis, infertility can be treated with less intensive options.

If you do not achieve a viable pregnancy from your 1st IVF cycle with an embryo transfer, we will significantly reduce the Cycle Management Fee for a subsequent cycle (meaning the patient "gap" will be \$500 or less)

## You won't find this anywhere else!

### Terms & Explanation

#### The guarantee cycle excludes:

- Cycle Establishment fee
- Donor oocyte cycles
- Genetic testing cycles
- Services not provided by Coastal IVF
- Anesthetic or theatre fees

#### Viable Pregnancy:

The pregnancy must be ongoing, confirmed by ultrasound, (typically around 6-7 weeks of gestational age).

#### Subsequent Treatment Cycle:

The guarantee only covers the next treatment cycle, which must begin within six months of the start date of the initial treatment cycle. In consultation with your clinician, you can choose whether the next cycle will be a frozen embryo transfer or an IVF cycle.

Medicare Safety Net Rebate: If the guarantee cycle extends into a new calendar year, a small additional cost may be incurred due to changes in the Medicare rebate system.

Patient GAP =Out-of-Pocket Costs: These are the expenses remaining after Medicare rebates are applied.
